

**My son Jeremy is a 14 year old boy with Asperger Syndrome. He has never displayed much confidence in himself. Jeremy had tried karate several years ago at a place that claimed to have experience with special needs kids. He had a terrible experience. When I first asked him if he would like to try karate again at New Horizon in an all special needs class I didn't think he would actually go for it. He was excited and wanted to try it out.**

**It has been the best experience I could ever have hoped for. Master Alty could not be anymore perfect to work with our kids. He has given Jeremy confidence and a better knowledge of how his body works. I could not picture him doing so well with balance issues but Master Alty has a knack for motivating our kids.**

**I cannot thank him enough for his kindness and ability to motivate these kids. They finish class with him and all come out smiling, proud of their successes.**

**Master Alty honors their abilities in small steps in between testing for the next belt. I would highly recommend this program to any of the Center families. It has been such a positive experience for us and I can't thank Master Alty enough for his kindness and dedication in creating such a positive experience for our kids.**

**Jen Brown - Parent**
